Experience

Software Engineer

5/15 - Now **iFixit - Dozuki**, *Full Time*, San Luis Obispo, CA.

Notable Experiences:

- Full stack web, automated testing, and devops when required.
- Building out front end interfaces from spec and design.
- Work with automated AWS infrastructure build scripts and continuous delivery deployment scripts.
- Query optimization and caching to increase performance.
- Developing back end interfaces and API endpoints for use in web apps and mobile apps:
 - <https://www.ifixit.com/api/2.0/doc> and <https://www.dozuki.com/api/2.0/doc>
- Training new full stack engineers.
- On call for server and application emergencies to triage and resolve any pressing issues.
- Experience working remotely on a different time zone with a US based team.

QA Engineering Intern

4/14 - 5/15 **iFixit - Dozuki**, *Part Time*, San Luis Obispo, CA.

Fulfilled many roles balanced equally between QA and Dev.

Notable Experiences:

- Wrote new features and fixed bugs for core applications and tools.
- Created a wide variety of automated tests for new features and improving test coverage.
- Learned to develop within an agile team of 20 developers that emphasized rigor and code quality.
- Worked with Linux in development and production.
- Became very comfortable in command line environments.
- Multitasked between a wide range of apps that had varying requirements.

Programming Languages

- Go, PHP, Javascript, Python, Ruby, Bash, Java, C

Education

current **Computer Science**, *Cuesta College*, San Luis Obispo.

Completed all computer science courses, finishing remaining courses for Associates

Projects

Past personal projects are on github.com/mooreguy
